A. Chair VALUE

A. Technical data

A.1.1. Swiveling seat with medium-sized united backrest, seat and armrests.

A.1.2 The 5-star base of the chair has a diameter of 660 mm and is made of die-cast aluminium. It has twin castors made from reinforced thermoplastic material (polyamide). The twin castors can be replaced with stoppers.

A.1.3 The activation of the height adjusting gas lift is achieved through a lever which is accessible sideways under the seat..

A.1.4. Nickel-plated elegant armrests made of cast aluminium.

A.1.5. Shell of layered beech sheets, upholstered with the chosen fabric.

A.1.6 The mechanism of the seat is made of cast aluminum in combination with plastic and has a system with which the reclining of the seat by 7° is achieved and, accordingly, its stabilization.

Packing 1 piece per carton box

Weight: 8,8 kg

Volume: 0,24 m³
