

Classification

- A. Office desks
- B. Round desks

A. Office desks

A.1. Technical Data of Office desks

- A.1.1. The base of the desk consists of 30 mm thick side legs, 30 mm thick horizontal sub-surface and modesty panel made of a fixed and a movable part of 18 mm thickness. All are made of double-side melamine film coated 3-layer chipboard E1 in silver grey F509 finish.
- A.1.2. The desk top surface is made of 28 mm thick MDF, single covered with dark grey melamine on the bottom and HPL covering on the top. Under the desk top there is a 30 mm thick frame in anthracite colour, for the creation of a gap between the base and the desk top surface.
- A.1.3. All desks are created by two side legs which are connected together with the horizontal sub-surface with bevel joints and the modesty panel mounted between the two legs. The desk top of chosen colour is positioned over the sub-surface.
- A.1.4. The desk top and the horizontal sub-surface have two rectangular cable grommets for the routing of cables. In the case of a round desk, there is only one rectangular cable grommet and a nickel-plated metal round metal grommet on the sub-surface.
- A.1.5. Each side leg has two glides of polyamide on the bottom end, with 0-20 mm height adjustment range for levelling of the desk.
- A.1.6. Each side leg has 5 decorative aluminium cable grommets.
- A.1.7. The modesty panel which consists of a fixed and a movable part is also used as a cable channel. In the fixed part there are 2 rectangular grommets for cable routing.
- A.1.8. The glass of the movable modesty panel is 4mm thick and is chemically sand blasted.
